

Cranborne Chase and West Wiltshire Downs AONB

Planning and Transportation Seminar 28th February 2007

Aims

At the end of the day participants should have a greater understanding of the issues associated with rural roads, landscape character, and local distinctiveness.

You should be able to identify local character and characteristics, and determine what elements contribute to the distinctiveness of a rural locality.

You should be better able to identify 'anywhere' highway hardware and the ways and extent to which these can increase urbanisation and detract from the local, rural, scene.

The seminar will give you the opportunity to become better acquainted with alternative mechanisms to influence driver behaviour to enhance the local environment.

The Seminar will include undertaking character assessments and relating 'standard' and innovative traffic management solutions to sensitive rural localities.
